## Education

2022

**Bachelor of Computer Science**

Sukkur IBA University

2018

**Pre-Engineering**

Al-Noor College Mochh

## Skills/Tools

- React.js
- Next.js
- Node.js
- Javascript
- MongoDB
- Firebase
- Express.js
- Flutter
- VS Code
- Git
- Web Scrapping
- API Development
- Chrome Extension Development

## Other Interests

- Chess
- Badminton

# Muhammad Mubashir

## React Developer

As a freelancer and fresh graduate with a degree in Computer Science, I have a strong foundation in Web development and a passion for building innovative web applications. Proficient in JavaScript, React, Next, Node.js, and MongoDB, I have a proven track record of successfully delivering projects on time and to client satisfaction. I am eager to continue learning and growing as a Web developer and am seeking an exciting opportunity to utilize my skills.

## Experience

### Sep 2022 - Feb 2023

Columbia Fitness

#### Reactjs Developer

- Developed and maintained various web applications using ReactJS and Redux.
- Collaborated with a team of developers, designers, and project managers to ensure timely and efficient delivery of high-quality projects.
- Improved user experience by implementing responsive design and optimizing web performance.
- Demonstrated proficiency in HTML, CSS, JavaScript, and other web technologies.

### 2021-Currently Working

Fiverr

#### Freelance Web Developer

As a freelance web developer, I have added value to my clients by:

- Developing responsive and user-friendly web applications using a variety of technologies, including HTML, CSS, JavaScript, and React.js.
- Implementing advanced features such as authentication and authorization and server-side rendering using Node.js and Next.js.
- Streamlining the development process by using agile methodologies and tools such as Git.

## Projects

### Smart Electric Meter: Real-time Consumption Tracking and Predictive Power Control via Mobile App

- Retrieves and uploads real-time electricity consumption data to Firebase
- Allows user control of home appliances through mobile app (developed with Flutter)
- Includes an admin dashboard (built with ReactJS) to control and manage users' access to the system.

### Raspberry Pi Device Controller

- Uses Firebase as a real-time database to store and retrieve data and enable real-time communication between the mobile/desktop app and the Raspberry Pi device
- Mobile app built using Flutter, a mobile app development framework
- Desktop app built using ElectronJS, a framework for building cross-platform desktop applications

### Time Table Management System

- A web application built using ReactJS as the frontend and NodeJS as the backend while using MongoDB as database
- The application allows admin to create, view, and edit a schedule or timetable
- The application may have authentication and authorization features to allow multiple users to access and modify the same timetable

## Volunteer Work/Community Service

### Al-Shifa Eye Trust Volunteerism Program

Participated in the Al-Shifa Eye Trust volunteerism program

- Assisted with vision screenings and eye exams for underserved communities
- Educated patients on the importance of eye health and provided follow-up care
